SUMMARY

Motivated Computer Science student skilled in web development and Java. Experienced in building user-friendly projects with strong problem-solving and teamwork abilities.

PROJECTS

Amazon Clone │ Live Link
- E-commerce website built with HTML, CSS, and JavaScript featuring product listings and user login functionality.
- Designed a responsive user interface resembling Amazon's layout.
- Implemented navigation bar, product cards, and cart layout using only HTML, CSS, and JavaScript.

Online Food Ordering Website │ Live Link
- Designed a clean and attractive interface using HTML and CSS.
- Showcases food items with simple navigation for easy ordering.
- Responsive layout compatible with both desktop and mobile screens.

Tindog Website │ Live Link
- Utilized Bootstrap for faster UI development and responsive grid system.
- Used Bootstrap components like cards, buttons, and forms to reduce development time and maintain design consistency.
- Features smooth navigation and mobile-friendly design.
